In [Problem Sleuth](#)

[Courtesan Angels](#) are feminine creatures summoned at the behest of the [Demimonde Goddess](#); through principles of uncertainty regarding the existence of angels in a vacuum, they can sometimes split into angel/**antiangel** pairs. 🏠

In [Sweet Bro and Hella Jeff](#)

Sweet Bro needs to know [what ANGEL to use](#) 🏠 to pour a carton of milk. It is possible he is actually referring to the angle here. Terezi would later [reference](#) 🏠 this in Homestuck to Sollux's confusion in a conversation about actual angels, despite never having read SBaHJ at that point.

In [Homestuck](#)

ing the [cherub](#) race named for an order of Biblical angels, Homestuck's mythology.

Angels are described in fearsome terms, as [terriible](#) [mythiical \[demons\] / wiith the2e awful feathery wiing2](#) 🏠;

apparently **paradox 2pace u2e2 them two u2her iin the end**. This negative perception of angels and their purpose may derive from the major role of cherub **Lrd English** in Alternian history, who has been called **THE ANGEL OF DOUBLE DEATH**. ^[1]

The first angels to appear in the flesh are residents of **Eridan Ampora's Land of Wrath and Angels** and symbols of the angel-winged **Hope aspect**, who prophesized a **lord of all angels** ^[2] that Eridan would need to defeat. Though Eridan assumed this prophecy referred to the arrival of the winged **Jack Noir**, **Cronus Ampora's** angels foretold **an extraordinarily evil magician**, ^[3] indicating that the Lord may have been **Lrd English** himself. In any case, Eridan spent most of his time in **Sburb** killing off his planet's angels in preparation for the Lord's arrival, though all evidence indicated this was not the intended purpose of the creatures: they were able to absorb **at least a minute of sustained fire from only the most legendary weapon evver** before dying, and **DIDN'T EVEN DROP ANY GRIST**. ^[4] **Doc Scratch** does, however, imply that Eridan's exposure to the angels' prophecies is how he

🧙 through his **wand**, in a similar way to **Rose Lalonde's** connection to **magic** through the **horror terrors**.

After both Eridan and Cronus' failure to defeat the lord of angels, the role passed on to the **Page** of Hope, **Jake English**. When **Aranea Serket "healed"** 🧙 the Page, angels were among the creatures manifested by his explosive **hope field**. 🧙 Presumably, Jake's involvement in the defeat of **Caliborn** before the sealing of his soul within **Lil Cal** served as a fulfillment of the prophecy.

- Eridan's claims the angels were difficult to kill in part thanks to their being **FAST** and **ANGRY** as **shit**, and his comments regarding **wwhite** fury **bled** from the **wwrath-wweary** eyes of **fifty thousand nonfictional angels** [who] **wwhen** they're finished **wweepin** [...] **wwill** bow **wbefore** their **prince** 🏰, may reference the famously difficult to defeat **Weeping Angels** of the *Doctor Who* franchise, who are so fast that they can appear near-instantaneously in the time it takes to blink.

Though when pressed for the name of the man, he would not say it, claiming it was too dangerous to even enunciate. Part of his self-aggrandizing mythos was that this magician once somehow from afar tried to strike him down at a young age, so he would never have to face him. 8ut the evil spell was deflected, sealing the magician's spirit away in a series of unassuming vessels until he could find some other cunning way to enter our universe. The attack supposedly left him with his distinctive scar, which he was not reluctant to point out when trying to hit on me. Uh, I mean, he wasn't reluctant to mention it in casual conversation.
